

LunchBox

*Focus on the main thing,
feeding the students.*

Rejoice in the accountability that comes with LunchBox POS Back Office. Compliance with state and federal mandates is assured. State audits are worry-free.

The reporting tasks that take place daily in your cafeteria “back office” are transformed by LunchBox POS Back Office software. Cash drawer balancing and quick-click end of day processing move your cafeteria staff out the door in record time. POS Back Office automatically calculates and stores counts and participation data with speed and accuracy. It generates reports on demand for your CRE audits. And you can feel secure in the knowledge that daily checks and balances have produced error-free reports.

POS Back Office is the automated tool for producing cash and count reconciliation and reporting daily participation data to the central office. It is a school-based tool that directly impacts the efficiency and productivity of the cafeteria staff. Use it to manage POS menu views, including color, position, meal vs. a la carte items and price. Load it with your district’s rules, standards and procedures for charges, low funds, etc., so that enforcement becomes automatic and is consistent across serving lines. Back Office automatically backs up your data and POS transactions as part of the end of day process.

Other benefits that LunchBox POS Back Office brings to your operation...

- For security and accountability, a history of every detail that affects participant accounts is recorded.
- In addition to standard and required reports, you can create your own custom reports using participant data.
- HACCP management – record and store USDA-required temperature readings in a customizable data entry log for quick reporting by selected date range.
- Turn entrees and a la carte purchases into reimbursable meals with Meal Build capability.
- Import student photos from the district’s student information system into LunchBox for positive identification.
