

## Equipment Stands

Our equipment stand has the rugged durability to deliver years of dependable service. Perfect for cafeteria Point-of-Sale equipment. Designed with a 2 1/2" diameter opening on the counter that enables larger electrical cords and plugs to drop safely and neatly to the floor and a small opening on one side for a POS data cord. The bottom shelf features a cut-out so the operator can sit comfortably. There are no sharp corners to damage walls. The stand comes fully assembled and is easy to clean. Tray rails can be ordered in two heights. The heavy duty 5" casters offer quick and quiet maneuverability (2 fixed and 2 swivel with brakes).

POS STAND
